

THRIVING FORESTS & REGENERATIVE BUILT ENVIRONMENTS

WHEN September 14-15, 2022
WHERE On Zoom

Thriving Forests & Regenerative Built Environments - The first event of its kind hosted by the Royal Architectural Institute of Canada (RAIC) and Pilot Projects Collaborative (Wood at Work).

This September, join us at this important symposium that will engage participants on multi-disciplinary questions surrounding relationships between forest legacies past and future, and the design, construction, and stewardship of our built environments.

A series of experts will discuss topics such as Indigenous perspectives on sustainable forestry, the carbon sequestration potential of Canadian forests and wood products, community perspectives on regenerative built environments, and the roles that architects can play in integrating these considerations into their practices.

Sponsorship starts at \$1000. We are committed to working with our sponsors to find the best way to deliver your message to the AEC community through unique activations!
